

AgileBA[®]

Agile Business Analyst Foundation And Practitioner

Overview

This **Agile Business Analysis Foundation and Practitioner** training course is an integrated course, which enables delegates to acquire both Foundation and Practitioner certifications. Business Analysts play a crucial role within Agile environments, hence they need to possess the relevant skills, knowledge, and experience desired by organisations.

This ensures knowledge is converted into practice, and confirms delegate's skill capability. This training course will teach delegates the significance of applying Agile tools and frameworks when conducting Agile projects. Delegates will be able to assess and understand stakeholder requirements, which is vital in achieving business performance improvements.

Course syllabus

- The role of the Business Analyst in an Agile World
- Agile Fundamentals and the Agile BA
- The Agile Business Case
- Stakeholders in the Agile Project
- Requirements and User Stories
- Prioritisation
- Workshops
- Modelling
- Timeboxing and Iterative Development
- Requirements Planning and Estimating Throughout the Lifecycle
- The Requirements Lifecycle in an Agile Project
