

# Streamlined Energy and Carbon Report 2022

NEWHAM COLLEGE OF FURTHER EDUCATION

27-10-2022

## QUALITY REVIEW AND APPROVAL RECORD

The Inenco Group is committed to delivering the highest possible standard of service and operates a Quality Management System certified to ISO 9001: 2015.

As part of this process, your deliverable has been checked and authorised for issue, as evidenced by the approval record below.

## INTRODUCTION

This report has been produced by Inenco to provide the necessary information to achieve compliance with Streamlined Energy and Carbon Reporting for the financial year ending 31<sup>st</sup> July 2022

### Eligibility- Non-Quoted

We have confirmed that Newham College of Further Education meets 2 or 3 of the following criteria for the most recent Financial Year, so must disclose their UK electricity, gas and transport energy consumption and associated emissions:

- Turnover over £36m
- Assets of over £18m
- More than 250 employees

This UK-incorporated company, or group of companies, is not Listed on a stock exchange such as the London Stock Exchange, so is classified as a Non-Quoted Large Company.

### Mandatory disclosure

The information provided in this report should be inserted into Newham College of Further Education Annual Directors' Report to ensure compliance with The Companies Act 2006 (Strategic Report and Directors' Report) Regulations 2013 and The Companies (Directors' Report) and Limited Liability Partnerships (Energy and Carbon Report) Regulations 2018; the latter commonly referred to as Streamlined Energy & Carbon Reporting (SECR).

## INFORMATION FOR PUBLICATION IN ANNUAL REPORT

### Summary

Newham College of Further Education greenhouse gas emissions, reportable under SECR in the 2021/2022 financial year were 1,070 tonnes CO<sub>2</sub>e.

These include the emissions associated with UK electricity and natural gas consumption. Due to the whole fleet now solely consisting of EV vehicles which are charged onsite there are no transport emissions for the last Financial Year. Newham College of Further Education greenhouse gas emissions were 1% lower than in previous year. The intensity of 29.72 tonnes CO<sub>2</sub>e per million pounds of revenue is the same as last year.

### Greenhouse gas emissions

Figure 1 Greenhouse gas emissions by year (tonnes CO<sub>2</sub>e)

Emissions source	2020/21 (market-based)	2021/22 (market-based)	Share (%)	YoY Variance (%)
Fuel combustion: Natural gas	1,014	1,030	96.32%	2%
Fuel combustion: Transport	0.3	0.0	0.00%	-100%
Purchased electricity	61	39	3.68%	-35%
<b>Total emissions (tCO<sub>2</sub>e)</b>	<b>1,076</b>	<b>1,070</b>	<b>100%</b>	<b>-1%</b>
Revenue (£m)	£36.19	£36.00		-1%
<b>Intensity: (tCO<sub>2</sub>e per £m)</b>	<b>29.72</b>	<b>29.72</b>		<b>0%</b>

\* The 2021/2022 emissions figure for purchased electricity above (and used throughout) reflects Newham College of Further Education's investment in a zero-carbon electricity tariff at all sites from April 2020 onwards. In the terms of the Greenhouse Gas Protocol, this is called 'market-based' reporting - as opposed to 'location-based' reporting. Location-based reporting does not take into account the electricity supply contracts a company has and instead uses a national carbon emissions factor for electricity. Following the location-based methodology (which is required to be also reported under SECR alongside market-based figures), Newham College of Further Education's 2021/2022 emissions from electricity were 470 tCO<sub>2</sub>e (including transmission and distribution losses), giving total emissions of 1,501 tCO<sub>2</sub>e and an intensity of 41.68 tCO<sub>2</sub>e per £m of revenue – a 0.6% reduction on 2020/2021.

Figure 2 Greenhouse gas emissions by scope (tonnes CO<sub>2</sub>e)

Emissions source	2020/21 (market-based)	2021/22 (market-based)	Share (%)	YoY Variance (%)
Scope 1	1,015	1,030	96%	2%
Scope 2	0	0	0%	
Scope 3	61	39	4%	-35%
<b>Total emissions (tCO<sub>2</sub>e)</b>	<b>1,076</b>	<b>1,070</b>	<b>100%</b>	<b>-1%</b>

*Scope 1: Natural gas. Scope 2: Nil due to green tariffs. Scope 3: Losses from electricity distribution and transmission. This only includes emissions reportable under SECR and may not reflect the entire carbon footprint of the organisation.*

There are zero emissions showing for scope 2. This is due to the green rate used by Newham College of Further Education since April 2020.

## Energy consumption

Figure 3 Energy consumption by year (kWh)

Emissions source	2020/21	2021/22	Share (%)	YoY Variance (%)
Natural gas for heating	5,538,609	5,645,061	72%	2%
Transport fuel	1,124	0	0%	-100%
Electricity	2,174,318	2,227,578	28%	2%
<b>Total consumption (kWh)</b>	<b>7,714,051</b>	<b>7,872,640</b>		<b>2%</b>

## Boundary, methodology and exclusions

An ‘operational control’ approach has been used to define the Greenhouse Gas emissions boundary<sup>1</sup>.

This approach captures emissions associated with the operation of all buildings such as warehouses, farms and manufacturing sites, plus company-owned and leased transport. This report covers UK operations only, as required by SECR for Non-Quoted Large Companies.

This information was collected and reported in line with the methodology set out in the UK Government’s Environmental Reporting Guidelines, 2019.

Emissions have been calculated using the latest conversion factors provided by the UK Government. There are no material omissions from the mandatory reporting scope.

The reporting period is August 2021 to July 2022, as per the financial accounts.

## Energy efficiency initiatives

In terms of investment in energy efficiency initiatives, in the last financial year (2021/22) Newham College of Further Education has made limited investment in Energy Saving Opportunities with the exception of the whole fleet transferring to EVs. General good housekeeping has been maintained.

<sup>1</sup> An operational control approach to GHG emissions boundary is defined as: “Your organisation has operational control over an operation if it, or one of its subsidiaries, has the full authority to introduce and implement its operating policies at the operation”.
